managements specification.

On Point Document Outsourcing
IT Consultant

December 2022 - December 2022 (1 month)
Oakland, California, United States

- Responsible for securing local network and improving its security to meet industry standards
- Conduct penetration testing on association's network and systems to identify and address cyber
security threats
- Implement and conduct quarterly security checks to identify and address vulnerabilities in the network
and systems
- Patch any identified vulnerabilities to maintain the security of the network and systems

Salesforce
Corp Relations Intern
October 2020 - September 2021 (1 year)
San Francisco Bay Area

Working closely with the salesforce Veteran team, to upskill other veterans to bridge an unemployment gap of discharged soldiers.

Task included:
- Conduct market research on prospect companies.
- Create Informative presentations.
- Lead team meetings, providing business insight.
- Perform data validation on teams database.
- Reach out to new people, expanding network.

Genesys Works
Young Profesional
July 2020 - September 2021 (1 year 3 months)
Oakland, California, United States

With the 2020 Genesis Works cohort, we learned how to thrive in a professional environment. Learning soft skills, like writing an email, creating a network, and other related career building necessities. Genesys Works also assisted me in getting two certifications, one a basic excel proficiency cert, and two a Google IT cert.
